

Ben Compain
Gas Supervisor
Gas Operations – Capital Construction

July 10, 2026

Dear Central Hudson Customer,

In an effort to improve the safety, reliability, and performance of the natural gas distribution system, Central Hudson is undertaking a comprehensive natural gas main and service replacement program in select communities throughout the Mid-Hudson Valley to address and modernize aging infrastructure.

As part of this improvement initiative, Central Hudson will be investing in the natural gas system in your neighborhood by replacing the main lines in the street and service lines that connect to individual homes and businesses. Central Hudson is working with our construction partner, Granholm Construction, to install these new natural gas distribution mains and services.

The replacement of approximately 4,100 feet of gas lines in the Hamlet of Connelly is scheduled to begin in August and the project is estimated to take three months to complete. Construction trenching will occur along:

- **1st Street**
- **2nd Street**, between Plantasie/Plantasia Ave. and Magdalena Ln.
- **3rd Street**
- **Center Street**
- **Plantasie/Plantasia Avenue**
- **Spring Street**

If your service line is affected, Granholm Construction will contact you to schedule an appointment for its replacement. Please note that this entire process requires work to be performed both inside and outside of your home or business. Natural gas meters currently located indoors will be relocated by Central Hudson or one of our contractors to an outdoor location to improve future access to this equipment by utility personnel. All Central Hudson employees and contractors display identification badges.

Any disruptions to your property will be restored by our crews or our professional landscape and paving contractors. If you do not own the home or property, please refer all decisions concerning this work to the property owner.

Central Hudson is working closely with your municipal officials in planning this work, such as coordination with paving, restoration, and other planned infrastructure projects.

If you have any questions about this activity, please do not hesitate to contact me at (845) 235-3292. *For more information about this important initiative and to view weekly updates for each project, visit CenHud.com/GasProjects or scan the QR code below.*

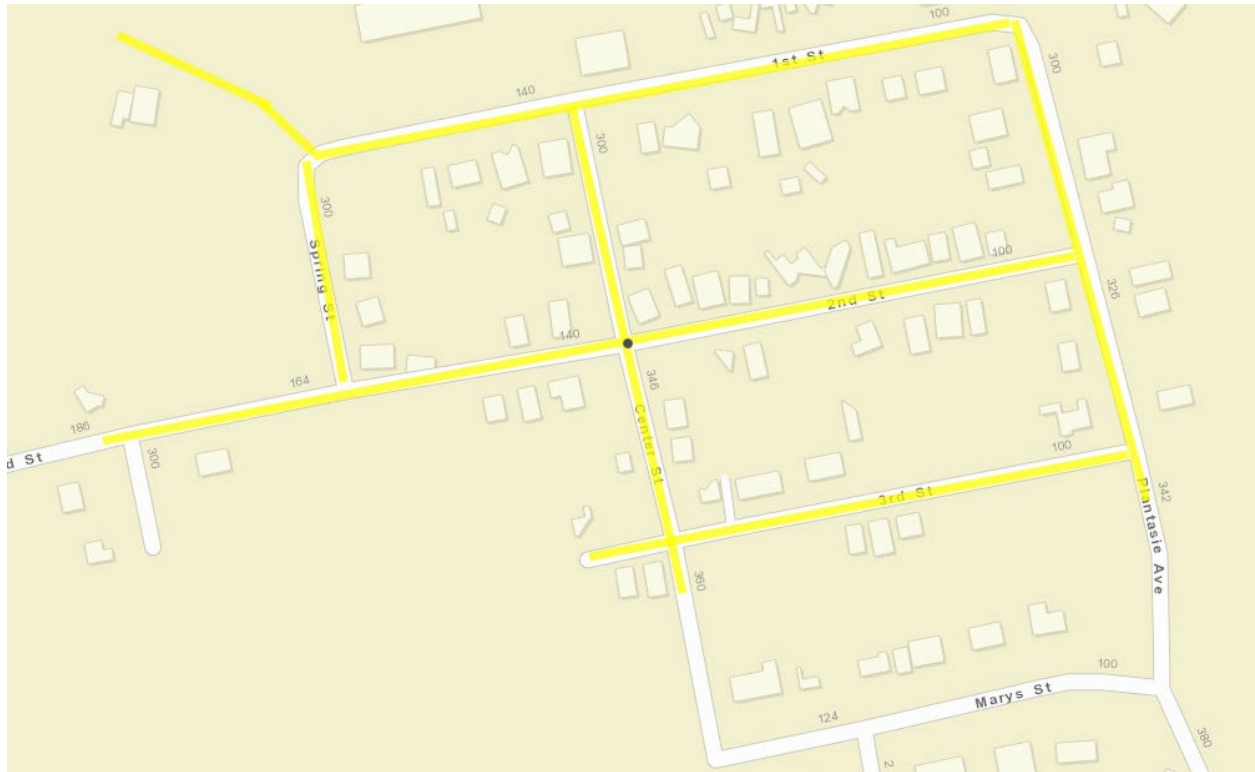

Sincerely,

Ben Compain
