

Shawn Farrell
Gas Foreman
Gas Operations – Capital Construction

July 27, 2021

Dear Central Hudson Customer,

As an essential provider, Central Hudson maintains critical energy services to our customers, all while continuing to follow COVID-19 safety guidance. As a part of this commitment, Central Hudson is undertaking a comprehensive natural gas main and service replacement program in select communities throughout the Mid-Hudson Valley to address and modernize aging infrastructure. This initiative is part of an effort to improve the safety, reliability and performance of the natural gas distribution system.

We are planning to invest in the natural gas system in your neighborhood by replacing the main lines in the street. This work will follow health and safety protocols established by health officials.

Central Hudson is working with our construction partner, Granholm Construction, to install these new natural gas distribution mains. Replacement of approximately 2,300 feet of gas lines in the Town of Lagrange is formally set to begin in August and the project is estimated to take 4 weeks to complete. Construction trenching will occur along:

- Hartstone Dr, between Hubbard Ln and Keith Dr

Any disruptions to your property will be restored by our crews or our professional landscape and paving contractors. If you do not own the home or property, please refer all decisions concerning this work to the property owner. All Central Hudson employees and contractors display identification badges.

Central Hudson is working closely with your municipal officials in planning this work, such as coordination with paving, restoration, and other planned infrastructure projects. We appreciate your patience as we install new facilities to better serve your needs. If you have any questions about this activity, please do not hesitate to contact me at (845) 249-5797.
