21	29	1-Mar	30	29	28	29	29	27	30	29	30	30

*** Due to SAP conversion, meter reading schedules for September, October, November, and December have changed**

Note: The number shown in each column above represents the calendar day for which readings are scheduled, for the respective cycle.

For example, in January, meters in cycle 1 are scheduled to be read on January 4.

Note: In addition to the Cycle number, each account is identified with a Period Code of 0,1 or 2.

A "0" indicates an account is read monthly. A "1" indicates an account is read bimonthly on odd months.

A "2" indicates an account is read bimonthly on even months.

Cycle 21 accounts are not read through a traditional meter reading group. Some of these accounts are read mid-month, and therefore their billing dates are from the 16th through the 15th of the following month.
