Note: The number shown in each column above represents the calendar day for which readings are scheduled, for the respective cycle. For example, in January, meters in cycle 1 are scheduled to be read on January 3.

Note: In addition to the Cycle number, each account is identified with a Period Code of 0,1 or 2. A "0" indicates an account is read monthly. A "1" indicates an account is read bimonthly on odd months. A "2" indicates an account is read bimonthly on even months.

Cycle 21 accounts are not read through a traditional meter reading group. Some of these accounts are read mid-month, and therefore their billing dates are from the 16th through the 15th of the following month.
