

Helping a local deli and catering business serve up better energy savings.

A smart program that helps cook up great savings on lighting costs.

East Fishkill Provisions, Smoke Haus, Deli and Catering is a family-owned eatery that also smoked a variety of meats on the premises. The deli offers catering and onsite barbeques at their outdoor pavilion. With two locations each open seven days a week, cost effective and efficient lighting is important for East Fishkill Provisions to maximize profit. Partnering with Lime Energy and program partner Central Hudson, East Fishkill Provisions was able to make energy-efficient upgrades by switching to interior and exterior LEDs.

Following these upgrades, owner of East Fishkill Provisions, George Mustakas, saw immediate improvement in business. **“The upgrade was just as expected, I am seeing benefits already,”** Mustakas noted. **“I noticed more people eating in the restaurant as opposed to take out.”** The Smoke Haus was also able to save over \$2,000 annually and is now using 60.6% less energy to light the business.

Annual savings	\$2,591.00
Incentive paid	\$4,675.55
Measures implemented	Interior & Exterior LEDs
Total project cost	\$6,917.15

Lime Energy—Helping organizations realize energy savings through energy efficiency.

Small businesses are the pillar of the US economy, constituting 90% of all commercial customers over the past 20 years.
