

Central Hudson DCFC Incentive Site Host Agreement

The Central Hudson DCFC Incentive Program is a program that provides incentives to electric vehicle (EV) charging equipment owners who install DCFC charging stations at public sites in its service territory.

Central Hudson will provide varying incentives per charging port installed upon completion of the installation of charging equipment and the provision of appropriate documentation. To participate in the Central Hudson DCFC Incentive program, applicants must provide authorization from the property owner or an authorized agent of the property owner that gives the applicant permission to install charging equipment at the site. To authorize this installation, the property owner (or an authorized agent of the property owner) and the equipment owner (Applicant) must read and complete this form. If the Applicant is the property owner, its completion of this form serves as attestation that it is the property owner and has the right to install the charging equipment on its property.

Applicant

Organization Name:	
Installation Site Address:	
Number of Charging Ports to Be Installed:	

Property Owner or Authorized Agent of Property Owner

By signing this form, I give the Applicant listed above the authority to install the EV charging station equipment at the property address listed above. I acknowledge and agree that Central Hudson Gas and Electric Corporation shall have no liability to the property owner relating to the installation and operation of the charging stations, and that all such liability and responsibility shall be between the property owner and the Applicant.
