	NYS & Local Taxes and Surcharges *		4.78
	TOTAL GAS COST		\$191.35
#	For this billing period, the average cost of energy we purchased for you was \$0.43677 per Ccf (excluding taxes). You can use this number to compare our price to other suppliers' prices.		

The following example explains line items found on residential natural gas bills.

Natural Gas Delivery Charges

Delivery charges represent Central Hudson's costs for delivering natural gas to homes and businesses over our region's network of gas lines, operating and maintaining the delivery infrastructure, and providing an array of customer services.

- a Basic Service Charge:** Includes maintenance of gas lines, meter reading, and other services, including natural gas deliveries up to 400 cubic feet (4 CCF) or less over a two-month period.
- b Next:** The cost to deliver from 4 CCF to 96 CCF of natural gas to customers over a two-month period.
- c Next:** The cost to deliver additional natural gas (above 96 CCF) to customers over a two-month period.
- d Total Delivery Charges:** The total cost to deliver gas for all customers, whether purchasing energy from Central Hudson or an independent supplier. Includes Basic Service Charge.

Natural Gas Supply Charges

Supply charges are Central Hudson's costs for natural gas purchased on behalf of its customers on the wholesale market. *Note that Central Hudson does not mark up supply charges.*

- 1 Gas Supply Charge:** The average wholesale price of all natural gas required to meet the needs of Central Hudson's full service customers (those who purchase supply from Central Hudson, as well as delivery).

Other items

- * NYS & Local Revenue Taxes and Surcharges:** Taxes and surcharges imposed by the State of New York and local authorities, to be collected from all customers.
- # For this billing period:** This last paragraph indicates your average price of natural gas per CCF for the billing period, exclusive of taxes and delivery charges. This price can be used to compare other suppliers' natural gas offers.

With deregulation, customers are able to choose their electric and natural gas suppliers. Unbundled bills allow customers to see and compare supply prices so that they can make informed decisions.
